## What Your Score Means

**Scores of 35-40:** Outstanding! Your answers show that you are aware of the importance of this area to your overall wellness. More importantly, you are putting your knowledge to work for you by practicing good health habits. As long as you continue to do so, this area should not pose a serious health risk. It's likely that you are setting an example for your family and friends to follow. Although you received a very high score on this part of the test, you may want to consider other areas where your scores could be improved.

**Scores of 30-35:** Your health practices in this area are good, but there is room for improvement. Look again at the items you answered that scored one or two points. What changes could you make to improve your score? Even a small change in behavior can often help you achieve better health.

**Scores of 20-30:** Your health risks are showing! Would you like more information about the risks you are facing and why it is important for you to change these behaviors? Perhaps you need help in deciding how to make the changes you desire. Help is available from [Infinite Health Coach](#). Schedule an appointment with one of our health coaches for a personal and confidential health coaching sessions.

**Scores below 20:** You may be taking serious and unnecessary risks with your health. Perhaps you are not aware of the risks and what to do about them. You will find the information you need to help you located in the Wellness Library at [Wellness Proposals](#).
